Wide Area LED Lighting Stringers

Duraline **Wide Area LED Lighting Blocks and Streamers** provide safe, effective overhead lighting for any number of purposes and locations. Blocks are typically spaced at either 15' or 20' intervals, and come with molded NEMA 5-15 plugs for easy use, but other connectors are available. Each Lighting Block can be equipped with either an epoxy coated magnet or an attachable grommet assembly, ideal for hanging and using as temporary lighting. Each fixture weighs approximately 8 lbs and produces up to 5,000 Lumen on only 36 watts, and all blocks are NEMA 4 rated and have 277/120V input. It is also equipped with a Lexan lens for ultimate durability.

These Lighting Blocks can also be molded to any specified interval and length. They are molded in solid, UV stabilized, and flame-retardant rubber. Our molding process ensures no air gaps or voids, and that every part is integrally molded directly to cable. These assemblies are available in either a 90° or 15° configuration.
